## Revolution in slimming

Are your clients constantly looking for better and long-lasting solutions in preserving youthful appearance and slim body? Are they constantly complaining about the available options?

### Here comes the revolution!

°CRYO Wave is a device for non-invasive body modeling, slimming and skin rejuvenation procedures, which will enrich the offer of your modern beauty salon, SPA or wellness clinic. The machine contours all main concerned area of the body through the non-invasive treatments of heat and cold usage.

The best results in terms of measurements can be seen around abdominal area as it can be easily measured by measuring tape.

## Applications

°CRYO Wave procedures are recommended for people with a regular body structure, with a local excess of body fat, which is resistant to diet and exercise. The procedures may also be used by people who are looking to improve the appearance of their skin, want to make it look more firm and rejuvenated.

The device is dedicated to women and men, for the chosen parts of the body that depends on sex:

- Face
- Upper body
- Lower body

## Available treatments

- Body contouring - treatments of this type are designed to eliminate or reduce excess fat tissue, resistant to diet and exercise from places such as the torso, arms, chest and thighs;
- Body toning - treatments of this type eliminate or reduce the excess of the skin, which remains after a significant loss of weight or after pregnancy, significantly improve the skin's texture and elasticity as well as improving the look of areas with cellulite;
- Face lift - a series of facial treatments help to improve face oval, firms and tightens facial skin, it also minimizes double chin.

## Maximizing results

It is recommended to drink at least 3 liters of water after the treatment, apply additional massage, drainage or simply exercise. Furthermore, maintain a healthy balanced diet.

## Length and frequency of sessions

Procedures can be performed once every 2 weeks. Treatments will last between 20 minutes to 1 hour. For visible and lasting results it is recommended to perform 4-6 sessions per selected area.

## Contraindications

The device is a non-medical equipment. It is in no way intended to diagnose, treat or prevent disease. If the client is not sure if he can use the treatment, he should consult his doctor first.
