Cryosense Cabin

Apple® iPad® Remote Control Unit

Cryosense is only sauna that **combines heat and cold**

Cryosense can focus the cold **at different heights**

Cryosense comes with **advanced technology**, including a Siemens Controller (PLC), temperature sensors, and a VPN modem

Cryosense can be adapted to almost **any kind of nitrogen tank** at low pressure (22PSI)

Cryosense allows to **adjust the cold intensity** in the cabin throughout the session

The cabin is fitted with a **TFT screen** which shows all **parameters** throughout the session

**Intelligent drying** feature eliminates scheduled dry cycles

**Oxygen sensor** to measure the room oxygen concentration

The cabin can be controlled with an **iPad** using an **intuitive app**

pending

## CRYOSENSE: THERMAL CONTRAST CRYOTHERAPY

Thermal Contrast Cryotherapy is a unique feature developed by Cryosense in Spain. European athletes as well as beauty and wellness professionals have embraced this technology, which is now available in the US.

Cryosense's thermal contrast technology creates an even greater change in skin temperature than traditional Cryotherapy does by briefly exposing the body to a hot environment of up to 176°F and then dropping the temperature rapidly down as low as -320°F. The drastic change in temperature promotes the release of endorphins and amplifies analgesic effects for the user.\*

Cryosense and Cryomachines Inc. are excited to offer this unique device to the U.S. market.

\*These statements have not been evaluated by the FDA. Cryotherapy is not intended to diagnose or cure any disease.

Model	Cryosense
Dimensions	91in x 38in x 69in (H/W/D)
Weight	1056lbs
Voltage	A/C Power: 220V, single-phase electricity
Power Consumption (W)	300W (during operation) 3500W (during drying)
Remote Control Unit	Apple® iPad®
Temperature Range	176°F to -320°F
Run with	Liquid Nitrogen
Consumption	< 7.5l per session
Cool Down Time	< 2min
Warranty	2 Years
Price	\$ 68,000.-

**Cryosense offers 6 programs  
desinged to suit your needs.**

#### **FITNESS APPLICATION**

Regeneration and muscle development

Designed for professional athletes, people with high physical activity and high muscle tone. Post-exercise recovery to allow more frequent and intense training.\*

#### **PHYSOTHERAPEUTIC APPLICATION**

Anti-inflammatory and analgesic

Desinged to help reduce inflammation and stimulate circulation, which promotes pain alleviation, and muscle recovery.\*

#### **BEAUTY APPLICATION**

Caloric expenditure and metabolic activation

Designed to assist in weight loss by increasing caloric consumption. Improved circulation may help reduce fluid retention and offer a slimmer appearance. Exposure to the cold also stimulates collagen and elastin production, for firmer appearance of the skin.\*

#### **WELLNESS APPLICATION**

Relaxation and endorphine release

Achieve internal balance and hightend vitality. Increased natural endorphine release creates an overall sense of well-being and has shown to improve sleep.\*

#### **YOUTH APPLICATION**

Regeneration and muscle development in youth

Designed also for young athletes to help with post-exercise recovery.\*

#### **CUSTOMIZED APPLICATION**

Customizable Programs

Designed to meet your needs, with applications in health, sports, beauty, and wellness.\*
